Case Study for Zycomm Electronics Ltd

The Company

Zycomm was established in 1979 with the aim of filling a gap in the mobile radio market, the company’s philosophy is based on providing high quality two-way radio equipment selected to meet the customer’s requirements.

The company boasts an extensive range of equipment from handportable radios to mobile and base station units.

“Zycomm’s whole company has been transformed” Dean Street

The Need

Zycomm sought for a new technique for processing stock in and out of the warehouse, as it was a very manual process.

- Facility to track all stock items.
- Processing stock in and out of the warehouse needed to be quicker and more precise.

The Solution and Result

The Bridge software was fitted with traceability and stock movements, alongside some Opticon H22 hand held scanners.

- Operators are capable of tracking all stock items including products with unique serial numbers.
- Bridge is effectively improving the way the system functions, Zycomm’s stock levels are more accurate and processing stock in and out of the warehouse is a lot quicker.
